

# Did you get the memo?

A secret government document released this month contains disturbing and shocking information about how our government was dead set on taking the US to war..

As early as July 2002, the memo reveals that:

- Iraq was not as significant a threat as North Korea or Iran
- The case for the Iraq war was "thin"
- The administration's "intelligence and facts were fixed"
- President Bush's attempts at diplomacy were all a sham

Were we deliberately misled into war?

Do you think  
the government  
has a duty to us  
to explain the  
Downing Street Memo?

Read it for yourself  
Take action
